Central Florida, USA | [LinkedIn/AlanHernandez](#)

Summary

Frontend developer with 1+ year of professional experience building responsive web applications, dashboards, and client websites using React, Next.js, Angular, and TypeScript.

I have built production-style projects including an Angular analytics dashboard with Playwright E2E testing and a Next.js e-commerce app with Supabase, persistent cart state, and checkout flow.

Freelance experience includes shipping a WordPress business site for a real client, with strengths in reusable UI, responsive design, testing, and shipping polished user-facing features.

SKILLS

Languages: Typescript, HTML5, CSS3, JavaScript (ES6+)

Frontend: React, Angular, Next JS, Tailwind CSS, SCSS, Material UI

Testing/Tools: Playwright, End-to-End (E2E) Testing, Test Automation, Cross-browser Testing, Storybook, Vercel

Data/UI: Supabase, ApexCharts, ReCharts, REST APIs, state management, responsive design

CMS: WordPress, Gutenberg, Astra, Spectra, WPForms, Hostinger

EXPERIENCE

Bitarosa (Client Website)– Frontend Developer (Freelance) | 10/2025-02/2026 | [Live](#)

- Designed and built a responsive marketing website focused on lead capture, brand consistency, and mobile usability for small business.
- Diagnosed and resolved routing/publishing issues and caching problems, ensuring consistent behavior across devices.
- Configured Astra, Spectra, WPForms, and Hostinger settings to implement reusable page sections, navigation, and reliable contact form behavior.
- Coordinated updates directly with the client and shipped iterative improvements based on feedback and business needs.

F.E.N — Front-End Web Developer Intern | 08/2024–08/2025

- Built frontend applications and reusable UI components using React, Next.js, Angular, and TypeScript in a production-style training environment.
- Implemented dashboards, authentication flows, testing workflows, reusable UI components, and responsive layouts.
- Collaborated with instructors and peers to debug issues, refactor components, and improve performance and UX.

PROJECTS

Atlas Grooming – E-Commerce Store (2025) | [Link](#)

- A **fullstack e-commerce application** using **Next.js (App Router), TypeScript, and Supabase** with dynamic product data.
- Implemented a **global shopping cart system** using React Context + useReducer with **persistent state (localStorage hydration)**.
- Developed a **complete checkout flow** including shipping form, order summary, and confirmation screen.
- Created **dynamic product detail pages** with scalable data fetching and reusable UI components.

Education Analytics Admin Dashboard (Angular + TypeScript) | [Live](#) | [GitHub](#)

- Designed and built a **production-style admin dashboard** using **Angular, TypeScript, Signals, and SCSS**.
- Implemented real-time KPIs, attendance trends, grade distribution charts, and at-risk student detection logic.
- End-to-end testing using Playwright with cross-browser coverage (Chromium, Firefox) and automated CI execution via Github Actions.
- **Responsive layout** with a collapsible sidebar (drawer pattern) optimized for desktop and mobile.

DataSoft – Data Analytics Dashboard (2025) | [Link](#)

- Full analytics dashboard using **React, Next.js, TypeScript, MUI**, with reusable components, charts, and stat widgets.
- Added secure **Google OAuth** authentication with protected routes and session handling.
- Implemented real-time visualization with hooks.

EDUCATION & TRAINING

SkillCrush – Front-End Certificate (2024) - HTML, CSS, JavaScript, React, and Python.

NuCamp – Basic Fundamentals Front-End Developer Certificate (2023) - HTML, CSS, JavaScript and BootStrap

Lyman High School – Longwood, FL (2014) - High School Diploma (Computer Engineer Magnet Program)
